

Banco UAT — acceptance test

Proves the UAT box (**banco.wolfhold.app**) is ready for Felix: login & env, the migrated **5,111-product Artemis catalogue**, scan → sell, audit, reports. 100% green = ready to start capturing.

 **How to use:** open the links, do each step on your Fairphone, then tap **✓ PASS** or **✗ FAIL** on that row. Talk a note with the  if you like. Everything **auto-saves in this browser** — close it, come back, your progress is still here. When it's all green (or you want to send me the state), hit  **Copy results** and paste it back to me.

100% 15 steps · **15 pass** · **0 fail** · **0 left** ·  **100% — sign it off**

 **20:34**

Tester: Angel	Date: dd/mm/yyyy
Build: UAT b49 · d3706bf · Artemis Lucerne	Realm / login: kc-pos-realm-dev · felix / (your UAT password)

Tap to copy

Tap a chip to copy it, then paste where you need it.

lu26a0lufe0f Already known lu2014 donlu2019t log these as failures.

- Most products have no cost** lu2014 expected: cost is shop-private, you fill it during capture (only 55 came over).
- All barcodes are internal (2000000lu2026)** lu2014 real EANs come during capture; the shop labels scan fine.
- No margin report yet** lu2014 small build after capture.
- The till canlu2019t finish a sale with the network down** lu2014 no offline outbox yet; day-one net is UPS + wired LAN + paper.

The checks — do them in order

#	Do this	Expect this	Verdict	 Note
1	Open Banco POS and log in as	Lands on the dashboard, no error.	✓ ✗ @ 04:31	

#	Do this	Expect this	Verdict	 Note
	felix + your UAT password.			
2	Check the environment badge (top status bar).	A teal UAT pill — NOT “LCL” and NOT “SANDBOX”. That’s the box telling the truth about itself.	☒ ☐ @ 01:08	 System Info UAT Artemis Store u
3	Log out, look at the login screen.	NO “Demo: pam / felix” hint printed. The public page must not advertise a working login.	☒ ☐ @ 01:11	
4	New Sale → search (or “bong”).	Real products appear — e.g. <i>Hempsana Hanf Gel Roller</i> — NOT just 6 Treats. The catalogue migration landed.	☒ ☐ @ 05:12	 New Sale Transaction TXN-20
5	Open the category dropdown.	Dozens of real categories (Bongs, Grinders, Rolling Papers...), not just “Treats”.	☒ ☐ @ 06:40	
6	Product Catalog / Browse. Open any item.	~5,100 items. The product shows name, price, category, a real photo , and a description.	☒ ☐ @ 06:58	
7	Scan or type a barcode: .	The RIGHT product comes up first time (<i>Adapter NS 19/19 140mm, TAM-9908</i>). Scan integrity.	☒ ☐ @ 07:43	 New Sale Transaction TXN-20
8	Ring a test sale: add a product to the cart → checkout → pay CASH .	A receipt / confirmation. The sell flow works on the real catalogue.	☒ ☐ @ 08:22	
9	Refund or void that test sale (it’s just test data).	It reverses cleanly.	☒ ☐ @ 10:08	
10	Edit any product — change its	Saves without error.	☒ ☐ @ 11:48	

#	Do this	Expect this	Verdict	Note
	price or description, save.			
11	Open the Audit Cockpit (👤 Audit Log).	Your edit is there — who (felix), what changed, when . The trail is live.	✓ ✗ @ 18:03	works but i changed both price and cl
12	Open Sales Reports .	Loads; shows today's test sale.	✓ ✗ @ 18:15	
13	Open Catalog Health .	Shows the real gaps — missing cost on most, real EANs to add. That's your capture worklist, not a bug.	✓ ✗ @ 19:23	🏠🔧 Catalog Cockpit 📦 Catalog 📊
14	Install the app: browser menu → Install / Add to Home Screen.	Opens standalone (own window, no browser bar), launches to the scan screen. A real PWA.	✓ ✗ @ 19:45	did it on mobile already
15	Overall. Would you let Felix start capturing on this tomorrow?	If not — say exactly what stopped you in the 🗣️ box. That's worth more than the other fourteen.	✓ ✗ @ 19:59	

Overall voice note

How did the whole run feel? Anything clunky, anything to polish, anything a real user would notice. Talk it — it transcribes here. Edit freely.

e.g. 'QR caught first try every time, but the new-item create screen needs a bigger Save button'

Mic ready (Chrome/Edge). First tap asks permission.

Verdict

☒ ☒ PASS — all 10 green, ship to prod ☐ ☒ FAIL — see notes, fix first
